Yutong Jiang

2433545@tongji.edu.cn | +86 13880770220
M.Eng. Candidate in AI and Data Visualization at Tongji University

EDUCATION

Tongji University Sep 2024 - Mar 2027
M.Eng. in Artificial Intelligence and Data Visualization Shanghai, China
- GPA: 4.88/5.00 (Ranking: 5%) Supervisor: Ling Fan
- Courses: User Experience Design, Introduction to Intelligent Design, Design of Visual Analysis Systems

Tongji University Sep 2019 - Jul 2024
B.Eng. in Digital Media and Communication Design Shanghai, China
- GPA: 4.71/5.00 (Ranking: 5%) FYP Advisor: Yang Shi, Guanhong Liu
- Courses: Design Thinking, Design Practice, Open-source Hardware and Programming

Politecnico di Milano Feb 2023 - Jul 2023
Exchange program Milan, Italy
- GPA: 28/30
- Courses: Product Design, Exhibition Design, Philosophy of Design

RESEARCH EXPERIENCE

AI Informal Learning System Design Sep 2025 - Present
Master's Degree Thesis Project, Supervisor: Ling Fan
- Investigated informal learning on social media by analyzing viewers' motivations and emotional interactions with influencers, providing insights for design of AI-driven informal learning systems.
- Modeled user behavior dynamics through qualitative analysis and digital social media tracking data, translating multi-modal insights into actionable system design guidelines.

AI-Mediated Communication Support for Parents with Visual Impairments Apr 2025 - Sep 2025

Lead researcher | CDI lab, Tongji University, Supervisor: Qi Wang, Guanhong Liu

- Identified the communication challenges between parents with visual impairments and sighted children during outdoor informal learning through interviews, observations and focus group.
- Designed and evaluated a Wizard-of-Oz prototype integrating interest detection and prompt generation, bridging visual asymmetry to facilitate symbiotic learning.

Privacy Protection Design for Everyday AI Agents Jun 2025 - Sep 2025

Institute for Network Sciences and Cyberspace, Tsinghua University, Supervisor: Xin Yi

- Conducted quantitative studies examining privacy practices and challenges among independent AI agent developers, yielding empirical insights for design implications.
- Designed a trusted add-on on web agents to enable non-intrusive notification and control of sensitive information, uncovering users' delegation strategies.

Generative AI-Empowered Interactive Systems for COPD Rehabilitation May 2025 - Jul 2025

SustainableX Lab, Tongji University, Supervisor: Qingfan An

- Conducted mixed-methods evaluations with clinicians to assess fine-tuned LLM chatbots and AI-generated visual aids for COPD patient education.
- Prototyped an interactive web interface for patient record management and personalized rehabilitation education based on empirical insights.

Undergraduate Research - Scientific Literature Visualization Feb 2024 - Jun 2024

Bachelor's Degree Thesis Project, Supervisor: Yang Shi, Guanhong Liu

- Identified key user goals and reading patterns in literature visualization systems through interviews and surveys; translated findings into concrete design specifications.
- Designed a custom visual encoding framework and interaction flow and implemented a working prototype using parametric modeling in Grasshopper and interactive development in Unity.

HONORS AND AWARDS

- *1st Place* of PacificVis Visual Data Storytelling Contest 2025
- *2nd Place* of Design Factory Global Challenge 2025
- *Annual Selected Works* of 2025 China Data Content Conference 2025
- National Scholarship of China 2025
- Outstanding Graduate of Shanghai 2024
- National Scholarship of China 2022
- 2022

SKILLS

- Research Methods: In-depth Interviews, Field Studies, Focus Groups, Thematic Analysis, Wizard-of-Oz Prototyping, Statistical Analysis, Log Analysis
- Prototyping & Tools: Unity, C#, Figma, Cinema 4D, Grasshopper, Adobe Creative Suite, Midjourney, Stable Diffusion, Cursor, SPSS
- Languages: Mandarin (Native), English (TOEFL 107), French (DELF B2)
